

SIEMENS DIGITAL INDUSTRIES SOFTWARE

Xcelerator Academy certification

Gaining a competitive advantage by attaining Xcelerator Academy certification

Benefits

- Gain a competitive advantage by attaining Xcelerator Academy certification
- Become proficient in the Xcelerator portfolio by acquiring effective skills and techniques
- Attain enhanced credibility by validating your expertise
- Increase your professional credentials

Program outcomes

Xcelerator Academy certification enables your workforce to maximize your investment and achieve business goals.

Virtually-proctored certification exams are flexible and enable participants to demonstrate their proficiency level. Outcome-oriented supporting content provides the knowledge and skills needed to maximize product use and become certified. This is designed by learning and customer success experts.

Courseware includes Teamcenter® software, NX™ software, Simcenter™ STAR-CCM+™ software, MindSphere®, the industrial internet of things (IIoT) as a service solution, MENDIX™ platform, XPEDITION™ software and more. These products are a part of the Xcelerator™ portfolio, the comprehensive and integrated portfolio of software and services from Siemens Digital Industries Software. The content is specific to a particular product and role and supports all levels of proficiency.

certification

Features

- Competency-based learning journeys to guide learners from associate, professional to expert levels
- Virtually-proctored certification exams are flexibly accessible
- Study materials from online and instructor-led modules
- Evolving collection of courseware and certifications

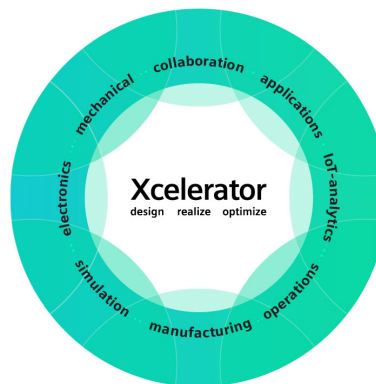

Program scope

Participants have access to best-in-class learning content, which is presented online or by an instructor. They may engage virtually, in-person or by a mix of both.

It is designed by experienced learning experts who leverage the skills and knowledge of one of the world's largest and most experienced customer success organizations dedicated to the digital twin. The content can be viewed as often as participants need and provides intuitive progression. Access to virtual lab environments to practice are available for some learning journeys.

Once the training is completed, participants can take a practice exam to prepare for the certification exam covering each area of study. After completing the supporting content and passing the exam, participants are certified.
